

## **Job offer for Radiologists with experience in mammography in Denmark**

A vacancy as a staff specialist in mammography radiology is open at Ringsted Hospital, Denmark.

The department is part of Næstved and Slagelse Hospital. Hospital, grouped under one Department of Radiology Management. The general radiological features in this department consist of conventional radiology, CT, MRI and ultrasound, predominantly on an outpatient basis on patients referred from general practice or clinical departments at hospitals in Region Zealand. The department of Radiology in Ringsted carries out the complete function in the Region for all breast diagnosis (mammography, mamma ultrasound and mammography screening). That means that the department is responsible for all breast cancer screening offers for all women in the region between 50 and 69 years. The department has MRI of the breast as a specific function. The department of radiology is a specialised unit for breast diagnostics and is working closely with the breast surgery department of Regional Zealand in Ringsted. The department is also responsible for studies in the cancer field, and carries out specific studies of elective profiles for all or a major part of Zealand, including shoulder-UL. The department receives referrals from the region's outpatient clinics, and a large scale of outpatients from general practice.

The department, including mammography screening, is fully digitalised. Carestream RIS-PACS system is being used. The department has funding for 11 specialists, and has a total of 60 employees. Approx. 60,000 radiological procedures and 45,000 mammography screening are carried out each year. The candidate will also have the opportunity to undertake some specialist functions in the areas of breast, ultrasound or MRI/CT.
